

Introducing **TUSK**, Mammoth Industries' proprietary Property Management System (PMS) tailored specifically for the workforce lodging industry. **TUSK** streamlines operations, enhances efficiency, and elevates the experience for both management and residents in remote accommodations.

Key Features of **TUSK**:

01

Comprehensive Room Management: **TUSK** offers flexible room booking capabilities, allowing for individual or group reservations. Its visual room allocation tools facilitate efficient space management, ensuring optimal occupancy rates.

02

Efficient Housekeeping and Maintenance: Assign and monitor cleaning tasks with ease, ensuring timely room turnovers. The system also supports maintenance ticketing, enabling prompt attention to facility issues.

03

Streamlined Front Desk Operations: Manage check-ins and check-outs seamlessly, with features like digital registration and mobile or kiosk-based self-service options, reducing bottlenecks and enhancing resident satisfaction.

04

Robust Reporting and Analytics: Interactive reports, providing insights into occupancy trends, operational efficiency, and financial performance, empowering informed decision-making.

05

Guest Mobile Application: Provides guests the ability to take control of their stay and interact with the housing operation through feedback, front desk communication, and maintenance/housekeeping requests.
